II. SCOPE OF SERVICES

A. Project Summary

The Town of North Hempstead (TONH) wishes to install Wireless Radio links to key sites both to support the network in event that there is an outage on the landline circuits as well as provide additional bandwidth and circuit paths.

The Town is seeking a vendor to provide site survey services and system design before a BID is released to validate or modify the proposed paths. The key objective of the site survey requires will confirm line of sight (LOS) and document findings between the key target site locations and assure that all risk factors will be revealed prior to the bid, with built-in measures to remedy any issues in order to achieve a 100% successful wireless infrastructure deployment.

The overall deliverable will include gathering a collection of high resolution digital photography used for verification of target sites in question. With completed LOS confirmation, allowing TONH to be in position to release the wireless BID

B. Statement of Work

The overall purpose of conducting the site survey is to validate sites that are proposed by North Hempstead as viable targets for wireless installation. Once confirmed by the survey, North Hempstead will issue a wireless circuit build BID

- Tower - Confirm LOS from each location visited.

- Recommend Alternative LOS if Initial off-site locations are not visible
